In Dubai (United Arab Emirates), various initiatives have been launched to promote an active and healthy outdoor lifestyle. **A wide range of sports equipment has been introduced in public spaces**, including elliptical machines, chest presses, exercise bars, rowing machines, pulleys, and more. These areas are designed for outdoor sports and physical exercise.
In order to protect users from the scorching heat that characterizes the summer months in Dubai, these spaces have been covered with **geovelas** provided by Benito Urban. These structures not only provide shade and protection against intense solar radiation, but also contribute to creating more comfortable and attractive outdoor environments for physical activity and general well-being.
In addition to these facilities for adults, a playground has also been opened as part of the **LETO collection**, accompanied by the impressive **RED CUAT structure**, spanning over 50 square meters. Furthermore, this playground is equipped with swings, seesaws, and other games for the entertainment of younger children. Like in the adult areas, geovelas are also present in the playground to protect children from the heat while they enjoy their outdoor activities.
