**Need / Problem:** The municipal garden required renovation to improve resting areas and ensure adequate lighting during low-light hours.
**Solution:** Installation of new street furniture and pedestrian lighting integrated into the surroundings.
**Result:** A more comfortable, accessible and safer space for everyday use by residents and visitors.
In **Lopera, a municipality in the province of Jaén, the municipal garden has been renovated to improve the quality of the public space** and strengthen its role as an area for walking, relaxation and social interaction.
The project includes **new RIGA benches** from the **Benito Design+ collection,** bringing a contemporary and refined appearance to the site. Their design helps organise seating areas and create more comfortable spaces throughout the garden.
In addition, **Citizen ECO benches** have been installed in other areas, expanding seating options and adapting to different points along the route.
The project is completed with **LIS bollard lights,** providing appropriate pedestrian lighting in low-light areas, improving visibility and enhancing the sense of safety.
The result is a more functional, pleasant and welcoming municipal garden that can be enjoyed throughout the day.

In the picturesque town of Cossato, located between Turin and Milan, a remarkable renovation has taken place in the central square. This renovation project introduced **new Citizen luminaires, Lis beacons, and Titan bins from Benito Urban,** transforming the space into a more modern and welcoming place. **The Citizen luminaires and Lis beacons,** featuring an elegant black finish, add a touch of contemporary design to the environment, **while the Titan litter bins,** equipped with a lid and integrated ashtray, combine functionality with aesthetics.

The result is an ideal space to relax and enjoy a stroll, providing a pleasant atmosphere for both residents and visitors.
