BENITO

Benito worldwide

Some of the projects we have done

Renovation of playground areas in Marratxí (Mallorca) with equipment for ages 6 to 12, inclusive elements, rubber flooring and design integrated into the environment.

Balearic Islands (Spain)

Geovelas, both square and triangular, have been installed in Plaza de Somorrotro in Segovia to provide greater protection during the summer to the Berna children's playground.

Segovia (Spain)

A great set of equipment from the Berna collection with slides, ropes and a hexagonal climbing wall in a playground in Segovia

Need / Issue: The play areas required upgrading to provide greater variety, inclusivity, and adaptation to different age groups.
Solution: Installation of new playground equipment, safety surfacing, and boundary elements.
Result: More inclusive, safe, and attractive spaces for children's play are created.

In **Marratxí (Mallorca),** several parks have been renovated with new play areas adapted to different ages. For **children aged 6 to 12,** the design draws inspiration from the island's landscapes, using a colour palette of blues, beige, and greens that integrate with the surroundings. The area includes **the Berna Lux play structure** in blue, balancing inclusive and challenging elements to provide educational play. It is complemented **by the Polo inclusive see-saw,** ensuring accessibility for all users, and the **Nut see-saw,** expanding play options.
The space is enclosed with **Puzzle fencing** and finished with **continuous rubber surfacing installed by BENITO,** ensuring safety and comfort. A set that promotes play, inclusion, and child development in a well-designed and accessible environment.

Climate change is one of the main concerns for local governments, as it directly affects the daily lives of citizens, especially during the summer months due to high temperatures. In this context, **Plaza de Somorrotro** in Segovia has been renovated with the goal of creating a more comfortable and safe space for children. The **LUX** element from the **Berna** line and the **ROKO02** climbing element have been installed in the children's playground, designed to promote physical activity and motor skill development.

To counteract the heat, **geovelas** have been incorporated, which are shade solutions with **textile architecture**. These tensioned structures are perfect for fully or partially covering any type of outdoor space, creating cool and shaded environments. Benito's **geovelas** are the ideal solution to transform any area into a safer and more comfortable environment. Designed with high-quality materials, they adapt to projects of all sizes and styles, offering unique benefits and improving user experience.

At Benito, we offer **customized shade solutions**, like in this project, ensuring a fresh and safe environment for everyone.

Segovia

A great set of equipment from the Berna collection with slides, ropes and a hexagonal climbing wall in a playground in Segovia

The Berna collection is one of the newest in the BENITO recreational equipment range. The city of Segovia decided on a great assortment of different pieces of equipment installed in a continuous arrangement.

The playground in which the equipment was installed has non-slip, accessible rubber flooring
