

The emblematic Eixample of Barcelona with our modern, safe and durable cycle lanes.

Gota
VBA21

Maia
H214ZR

Barcelona is becoming a reference when it comes to the application of urban solutions.

Most sections of the city cycle lane are already equipped with Gota separators. Moreover, the installation is usually complemented with the beaoning of the extremities thanks to the flexible bollard Maia, which is maroon and includes to reflective strips to bring visibility and elegance. Finally, other sections are equipped with the corresponding signage and the Biki maintenance station for bicycles.
