

The new furnishings at the Parque Ecológico Lago de Texcoco include Kube chairs and bins, Petrus loungers and Lisa concrete planters, along with Stark luminaires and Benito sports courts.

Ciudad de México (Mexico)

Renovation of the Olympic Port of Barcelona with Kube elements from Benito Urban, enhancing beauty and resisting saltwater. This improvement offers aesthetics and functionality to the coastal environment.

Barcelona (Spain)

The El Llano square in Alcalá and the maritime promenade of Playa de San Juan have new benches and bins.

Tenerife (Spain)

Installation of a picnic area on Pérez Galdós avenue in Valencia.

Valencia (Spain)

BENITO has installed urban furniture and luminaires in the new maritime promenade of Marina Vela in Barcelona.

Barcelona (Spain)

The Bulgarian capital chose Kube concrete benches, chairs and bins for one of its most popular squares, the Slaveykov Square, located in the city centre.

Sofia (Bulgaria)

The new furnishings at the Parque Ecológico Lago de Texcoco include Kube chairs and bins, Petrus loungers and Lisa concrete planters, along with Stark luminaires and Benito sports courts.

In Ecatepec de Morelos, very close to Mexico City, the **Parque Ecológico Lago de Texcoco** has been developed as one of the country's largest environmental, recreational and sports projects. **Designed to restore the former lacustrine environment and transform it into a green space accessible to millions of people**, the park integrates a wide network of facilities: **football and American-football fields, baseball fields and batting cages, multi-use courts, a skatepark, parkour circuits, a labyrinth, picnic areas, a bicycle-rental station, outdoor gyms and multiple rest and social spaces.**

Benito Urban has contributed to the equipment of this landmark project by installing **Kube chairs and bins, Petrus loungers and Lisa planters, all made of concrete**, a material that ensures high resistance and maximum durability in an intensive-use environment. Additionally, **Benito sports courts and Stark luminaires** have been incorporated, strengthening the park's activity offering and providing lighting suited to its needs. Thanks to these actions, the Parque Ecológico Lago de Texcoco is consolidated as a modern, ecological and fully equipped public space for sports, recreation and social integration.

Renovation of the Olympic Port of Barcelona with Kube elements from Benito Urban, enhancing beauty and resisting saltwater. This improvement offers aesthetics and functionality to the coastal environment.

Barcelona has completely renovated the Olympic Port, transforming it for the celebration of the America's Cup sailing event. After a long construction process, the facilities, originally inaugurated in 1991 for the Olympic Games, have been redesigned to offer more than 20,000 square meters of public space, creating a smoother connection between the city and the Mediterranean.

This project includes elements from **Benito Urban's Kube collection**, used to separate vehicle and pedestrian zones. These traffic barriers are robust and weather-resistant, designed to withstand the harsh conditions of coastal environments, making them an ideal choice for seaside areas. Additionally, **Kube litter bins** have been installed, sharing the same resistance and durability properties, ensuring high-quality urban furniture with low maintenance.

This project not only enhances the port's infrastructure but also offers citizens an open, modern, and accessible space.

The El Llano square in Alcalá and the maritime promenade of Playa de San Juan have new benches and bins.

Guía de Isora is a municipality located in southwestern Tenerife. It presents a great natural wealth since a part of it belongs to the Corona Forestal Natural Park and another one to the Teide National Park.

It consists of 17 urban nuclei among which we can find Alcalá and San Juan, which already have new **BENITO benches and bins made of concrete**.

These products are resistant to high levels of salinity so they will increase the comfort of the inhabitants and tourists of El Llano square and the maritime promenade of Playa de San Juan.

This project is part of the recent renovation of street furniture carried out by Guía de Isora in the areas close to the coast.

The City Council of Valencia has transformed a parking area located near the Pérez Galdós avenue into a square with a pergola and street furniture, such as benches and picnic tables which, combined with the paving, provide the space with its own design and identity..

The goal was to extend the pedestrian space on an axis with a large influx of vehicles. The **Pérez Galdós-Giorgeta avenue** is a very busy axis with an important presence of vehicles.

BENITO's Picnick tables are made of pinewood treated in vacuum pressure autoclave class IV against woodworm, termites and insects.

Comprehensive development project of the Marine Vela promenade in Barcelona including both street furniture and lighting.

The collection chosen in terms of furniture is the **Kube** one made of grey granite concrete. It is a very architectural product that allows space delimitation and differentiation. It requires low maintenance as concrete is an extremely resistant material.

As for lighting, Barcelona chose our flat **Milan floodlights** with low wind resistance. This double compartment LED floodlight is available in four sizes with extensive optical and light distributions. Moreover, it can be tilted in all directions thanks to its fixing bracket in order to adapt to the needs of all kinds of projects.

All BENITO lighting products are efficient and compatible with any intelligent lighting control solutions. They can be remotely controlled either individually or in groups thanks to an easy-to-use phone app.
