The **Monastery of Montserrat**, one of Catalonia's most iconic landmarks, now boasts a renewed night-time image thanks to the installation of over **50 LED projectors** and **40 meters of linear luminaires** developed by **Benito Urban**. This cutting-edge system achieves a **40% energy saving**, reducing CO? emissions and maintenance costs. Controlled via a **smart app**, the lighting allows adjustment of brightness, colour, and personalized scenes, managing each light point independently.
The project merges **technology, precision, and environmental sensitivity**, enhancing the architecture and spirituality of the site without disturbing its natural balance. The **Milan RGBW, Lineo RGBW, and Ciclo RGBW** models provide dynamic, efficient lighting that respects the historical setting.
Through this project, **Benito Urban** reaffirms its commitment to **technological innovation** applied to cultural heritage, combining **tradition, sustainability, and emotion** in a visually inspiring result.
