Tree Grate

Rel

Angle
L45

Regulations and certifications:

Tree Grate RELIGA, total dimensions (length x width x Ø) 765x765xØ11.81", manufactured in 2 parts with 1.34x1.50" electro-welded mesh, center to center, 1.18x0.08" load-bearing plate, 0.16" inter-twisted square separator, hot-dip galvanized finish, internal diameter of 11.81" (other measurements optional). Supported on a prepared surface.

Materials & Finishes:

Steel with a hot-dip galvanizing treatment to protect it from corrosion. Our galvanizing process complies with the UNE EN ISO 1461:2009 standard and involves immersion in a crucible of molten zinc at 450°C, during which a reaction occurs between zinc and steel resulting in different layers of alloy between the two metals, culminating in an external coating of pure zinc. To ensure proper application of the process, it is essential to subject the pieces to a preliminary process of degreasing, pickling, and fluxing.
