Low maintenance

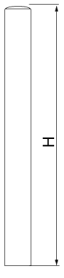

Regulations and certifications:

ISO 9001 ISO 50001 ISO 14001 ISO 45001

Stainless steel designer bollard, made of polished AISI-304 stainless steel. Recommended anchoring: Built-in base and concrete rods.

Materials & Finishes:

Stainless steel: Structural alloy with a high chromium and nickel content, resistant to corrosion. High resistance to weather, humidity, UV rays and chemical agents present in urban environments. Thanks to the natural formation of a protective passive layer, stainless steel does not require additional coatings, ensuring excellent durability, low maintenance and a clean, timeless appearance – even under demanding conditions such as coastal or industrial areas.
