Sol design bollard, made of steel with Ferrus treatment, a protective process for iron that guarantees optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities by shot-peening. It consists of zinc plating, followed by an epoxy primer, and a final coating of RAL 7016 gray polyester powder paint.

Materials & Finishes:

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.
