

HEXT
Bollard

extraíble Ø4.49x31.50"

Stainless
steel

Regulations and certifications:

HEXT design bollard, made of stainless steel. Fixed to the ground using a recessed base with a safety lock. Unlocking with a 0.39" triangular key. Optional: with reflective strip.

Materials & Finishes:

Stainless steel: Structural alloy with a high chromium and nickel content, resistant to corrosion. High resistance to weather, humidity, UV rays and chemical agents present in urban environments. Thanks to the natural formation of a protective passive layer, stainless steel does not require additional coatings, ensuring excellent durability, low maintenance and a clean, timeless appearance – even under demanding conditions such as coastal or industrial areas.
