Regulations and certifications:

ISO 9001 ISO 50001 ISO 14001 ISO 45001

Designer canopy with a steel frame (treated with the Ferrus process, a triple-layer protective layer for iron, ensuring optimal corrosion resistance). Bench made of tropical wood treated with protective oil. Laminated glass.

Materials & Finishes:

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.

Hardwood treated with LIGNUS: Wood from responsible forestry. Density greater than 930kg/m³, at 12% humidity, treated with a triple-layer LIGNUS coating, fungicide, insecticide, and water-repellent that provides protection against moisture penetration. Final finish with a layer of natural pigment in a satin finish, which provides additional protection against UV rays, the main cause of deterioration in this type of material.
