PICCO Litter Bin , total dimensions (width x depth x height) 22.44x23.23x39.37" , 23 gal, made of pine wood with class 4 vacuum-pressure autoclave treatment against woodworm, termites, and insects, natural color finish. Includes a cover that prevents water from entering the bag, and a door for easy bag replacement. Opens on both sides. Stainless steel hardware. Prepared for anchoring with three M8 expansion bolts depending on the surface and project. Available at reBnew.

Materials & Finishes:

Pressure-treated pine wood, risk factor IV, ensuring its durability outdoors for a minimum period of 10 years. Under weather conditions, treated wood develops a warm honey-brown color that eventually turns into a natural silver-gray. If exposed to variable weather conditions, this type of pine wood may develop some surface cracks that do not diminish its durability in any way. Regarding resin and knots, it's important to note that these are part of its natural appearance.
