MIELEK R designer Litter Bin , overall dimensions (Ø x height) 17.91x31.50", 21 gal, made of galvanized steel with inner bucket . Double-layer rustproof treatment. Galvanized steel sheet with polyester powder coating. Epoxy primer. Silver paint. Includes a cover that can be opened using a standard triangular key. Prepared for anchoring with four Ø10 screws, depending on the surface and project.

Materials & Finishes:

Steel with a hot-dip galvanizing treatment to protect it from corrosion. Our galvanizing process complies with the UNE EN ISO 1461:2009 standard and involves immersion in a crucible of molten zinc at 450°C, during which a reaction occurs between zinc and steel resulting in different layers of alloy between the two metals, culminating in an external coating of pure zinc. To ensure proper application of the process, it is essential to subject the pieces to a preliminary process of degreasing, pickling, and fluxing.
