MIELEK designer Litter Bin , total dimensions (width x depth x height) 16.14x16.14x31.50", 18 gal, made of galvanized steel with a galvanized steel inner bucket. Double-layer anti-rust treatment. Zinc-plated steel sheet painted with polyester powder paint. Epoxy primer. Silver paint. Includes a lid that can be opened using a standard triangular key. Prepared for anchoring with Ø10 screws, depending on the surface and project.

Materials & Finishes:

Steel with a hot-dip galvanizing treatment to protect it from corrosion. Our galvanizing process complies with the UNE EN ISO 1461:2009 standard and involves immersion in a crucible of molten zinc at 450°C, during which a reaction occurs between zinc and steel resulting in different layers of alloy between the two metals, culminating in an external coating of pure zinc. To ensure proper application of the process, it is essential to subject the pieces to a preliminary process of degreasing, pickling, and fluxing.
