Designer litter bin with three compartments, each with a 60-litre capacity, manufactured in steel (treated with the Ferrus process, the triple-layer protector for iron, which guarantees optimum resistance to corrosion) with RAL 7006 finish.

Materials & Finishes:

Steel with a hot-dip galvanizing treatment to protect it from corrosion. Our galvanizing process complies with the UNE EN ISO 1461:2009 standard and involves immersion in a crucible of molten zinc at 450°C, during which a reaction occurs between zinc and steel resulting in different layers of alloy between the two metals, culminating in an external coating of pure zinc. To ensure proper application of the process, it is essential to subject the pieces to a preliminary process of degreasing, pickling, and fluxing.
