Double Bench

NeoBarcino MAX

Controlled logging

Grey Casting

Graffiti protector

Inclusive Product

Hard wood

Regulations and certifications:

The NEOBARCINO PREMIUM Double Bench features a contemporary design, ideal for urban spaces requiring a robust, elegant, and highly durable solution. Overall dimensions: 118.11x32.87x27.95 in (length x height x depth). It has cast iron legs with a hammered gray finish. Six natural tropical hardwood planks are fitted directly into the bench to ensure precise integration, enhanced structural stability, and a clean, polished finish. The wood is treated with a triple-layer Lignus coating, providing fungicidal, insecticidal, and water-repellent protection, making it suitable for outdoor use. Stainless steel screws enhance corrosion resistance and ensure long-lasting fastening. It is prepared for anchoring with M10 expansion bolts, depending on the installation surface and project requirements. Optional (not included): customizable branding with a 2.91x1.38 in aluminum plate or a milled plank.

We offer the possibility to customize the product through personalized marking to enhance your corporate image:

- 74 x 35 mm aluminum plate with screen printing.
- Board machined by milling.

Materials & Finishes:

Ductile Iron treated with FERRUS: iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, involving an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint. Forged black colour

Hardwood treated with LIGNUS: Wood from responsible forestry. Density greater than 930kg/m³, at 12% humidity, treated with a triple-layer LIGNUS coating, fungicide, insecticide, and water-repellent that provides protection against moisture penetration. Final finish with a layer of natural pigment in a satin finish, which provides additional protection against UV rays, the main cause of deterioration in this type of material.

GRAFUS anti-graffiti protection (optional): Material protector against paints and markings that not only protects urban furniture but also restores its initial appearance, enhancing and facilitating cleaning. Meets cleaning requirements according to ASTM D6578. Withstands multiple cleaning cycles. Excellent chemical resistance (solvents, acids, bases), scratch resistance, and yellowing resistance. Strong adhesion on various paint substrates.
