Low maintenance

Regulations and certifications:

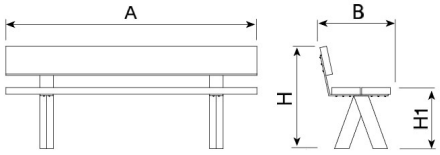

ISO 9001 ISO 50001 ISO 14001 ISO 45001

OLEA designer Bench , total dimensions (length x height x depth) 72.83x29.72x20.47", made with tubular Corten steel legs and pine wood planks (class 4 vacuum-pressure autoclave-treated to combat woodworm, termites, and insects). Stainless steel hardware. Prepared for anchoring with M10 expansion bolts, depending on the surface and project. Available at reBnew.
Optional not included: Customizable marking with 2.91x1.38" aluminum plate.

Materials & Finishes:

Corten steel: The material itself creates its own protection through oxidation. The oxidation process goes through different stages of color until it reaches "stop," which is when it acquires its final color and stops losing rust and staining.
The oxidation process and its tone vary depending on the location where the product is installed and the sun/rain/wind cycles to which it is exposed.

Pressure-treated pine wood, risk factor IV, ensuring its durability outdoors for a minimum period of 10 years. Under weather conditions, treated wood develops a warm honey-brown color that eventually turns into a natural silver-gray. If exposed to variable weather conditions, this type of pine wood may develop some surface cracks that do not diminish its durability in any way. Regarding resin and knots, it's important to note that these are part of its natural appearance.

Ref.	A	B	H	H1	Wt
