Regulations and certifications:

ELA PLUS 3000 designer Bench, total dimensions (length x height x depth) 118.11x34.25x31.50", made with a molded, water-repellent reinforced concrete seat in polished granite white, matte stainless steel frame and natural tropical wood slats (treated with a triple-layer Lignus coating, a fungicidal, insecticidal and water-repellent protector). Supported by its own weight on a prepared surface.

Optional not included: Customizable marking with 2.91x1.38" aluminum plate or milled board.

Materials & Finishes:

Concrete: Reinforced concrete with a pickled and water-repellent finish. Manufactured with cement, sand, and gravel embedded within a metal structure. Shot blasting results in a high-quality, durable texture.

Gray

Hardwood treated with LIGNUS: Wood from responsible forestry. Density greater than 930kg/m³, at 12% humidity, treated with a triple-layer LIGNUS coating, fungicide, insecticide, and water-repellent that provides protection against moisture penetration. Final finish with a layer of natural pigment in a satin finish, which provides additional protection against UV rays, the main cause of deterioration in this type of material.

Stainless steel: Structural alloy with a high chromium and nickel content, resistant to corrosion. High resistance to weather, humidity, UV rays and chemical agents present in urban environments. Thanks to the natural formation of a protective passive layer, stainless steel does not require additional coatings, ensuring excellent durability, low maintenance and a clean, timeless appearance – even under demanding conditions such as coastal or industrial areas.
