Silver color

Black forged iron

M10 bolts fixing

Regulations and certifications:

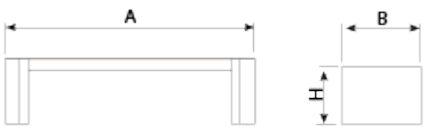

ISO 9001 ISO 50001 ISO 14001 ISO 45001

TRAU 2000 designer Bench , total dimensions (length x height x depth) 78.74x20.08x24.80", made of galvanized steel RAL 9006 (treated with the Ferrus process, the triple-layer protector for iron, which guarantees optimal corrosion resistance). Feet with epoxy primer and polyester powder paint in black forging and seat with epoxy primer and polyester powder paint in silver gray. Prepared for anchoring with M10 expansion bolts according to surface and project.
Optional items not included:
Customizable marking with 2.91x1.38" aluminum plate.

Materials & Finishes:

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.

Steel with a hot-dip galvanizing treatment to protect it from corrosion. Our galvanizing process complies with the UNE EN ISO 1461:2009 standard and involves immersion in a crucible of molten zinc at 450°C, during which a reaction occurs between zinc and steel resulting in different layers of alloy between the two metals, culminating in an external coating of pure zinc. To ensure proper application of the process, it is essential to subject the pieces to a preliminary process of degreasing, pickling, and fluxing.
