

UM3D10

Deck chair

ARES

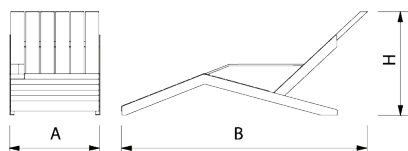

M10 bolts
fixing

RAL7006
Colour

Regulations and certifications:

Urban sun lounger with a side armrest that also functions as a side table. The steel frame (treated with the Ferrus triple-layer protective process for iron, guaranteeing optimal corrosion resistance) has a RAL 7006 finish, and the tropical wood is treated with protective oil. The ergonomic design features a continuous inclined plane that promotes a comfortable reclining position. The construction facilitates water drainage and ventilation of the materials, optimizing its performance in outdoor installations. The seating surface is made of solid wood slats suitable for outdoor use, machined and fixed to the metal frame with concealed anchoring systems.

Materials & Finishes:

Hardwood treated with LIGNUS: Wood from responsible forestry. Density greater than 930kg/m³, at 12% humidity, treated with a triple-layer LIGNUS coating, fungicide, insecticide, and water-repellent that provides protection against moisture penetration. Final finish with a layer of natural pigment in a satin finish, which provides additional protection against UV rays, the main cause of deterioration in this type of material.

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.
