Backless bench

RIGA

Black forged
iron

Hard
wood

RAL 7006

Regulations and certifications:

Curved urban backless bench, part of the RIGA collection, features a sleek curved design that complements any setting. Ideal for parks, squares, and recreational areas, this bench combines elegance with functionality, inviting both relaxation and social interaction. Its steel structure, treated with the Ferrus process for superior corrosion resistance, is finished in RAL 7006. The wood is expertly treated with protective oil, ensuring long-lasting durability and beauty.

Materials & Finishes:

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.

Hardwood treated with LIGNUS: Wood from responsible forestry. Density greater than 930kg/m³, at 12% humidity, treated with a triple-layer LIGNUS coating, fungicide, insecticide, and water-repellent that provides protection against moisture penetration. Final finish with a layer of natural pigment in a satin finish, which provides additional protection against UV rays, the main cause of deterioration in this type of material.
