Regulations and certifications:

Curved designer bench compatible with the rest of the elements in the RIGA collection to create a modular furniture system that allows you to customize your space. Steel structure (treated with the Ferrus process, the triple-layer protection for iron, which guarantees optimal corrosion resistance) with a RAL 7006 finish and tropical wood treated with a protective oil. Possibility of generating a circle with an interior diameter of 2 meters and an exterior diameter of 3.3 meters by combining 8 modules.

Materials & Finishes:

Hardwood treated with LIGNUS: Wood from responsible forestry. Density greater than 930kg/m³, at 12% humidity, treated with a triple-layer LIGNUS coating, fungicide, insecticide, and water-repellent that provides protection against moisture penetration. Final finish with a layer of natural pigment in a satin finish, which provides additional protection against UV rays, the main cause of deterioration in this type of material.

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.
