Double sun lounger with side table

PIRO

M10 bolts
fixing

RAL7006
Colour

Regulations and certifications:

Double urban sun lounger with a central side table. Steel frame (treated with the Ferrus triple-layer protective process for iron, guaranteeing optimal corrosion resistance) with a RAL 7006 finish and tropical wood treated with protective oil. Contemporary design with a low, enveloping silhouette, formed by a continuous plane that integrates the seat and backrest into a single inclined piece. Its side profile creates a clean, geometric structural line that slightly raises the sleeping surface off the ground and reinforces its light and modern character. The sun lounger area is composed of longitudinal slats that create a spacious and comfortable surface, designed for shared relaxation. An integrated, circular side table at an accessible height is located in the center, ideal for placing personal items without interfering with the use of the lounger.

Materials & Finishes:

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.

Hardwood treated with LIGNUS: Wood from responsible forestry. Density greater than 930kg/m³, at 12% humidity, treated with a triple-layer LIGNUS coating, fungicide, insecticide, and water-repellent that provides protection against moisture penetration. Final finish with a layer of natural pigment in a satin finish, which provides additional protection against UV rays, the main cause of deterioration in this type of material.
