CUADRADO

VBA34

Made of recycled rubber with white strips integrated in the part by vulcanisation. Eco-friendly product. Easy installation as the lane separator includes the clamping rings inside the rubber part itself.
Great robustness, shock absorbing, high resistance to abrasion, ozone and UV rays.
CUADRADO is recommended for speed regulation in residential and commercial areas, school zones and private parking lots. The width of the speed reducer allows big vehicles such as buses to pass while regulating the speed of light vehicles.

Ref.	A	B	H	Wt
