

VRP3400

Pergola

Kalahari

Treated pine
wood

Low
maintenance

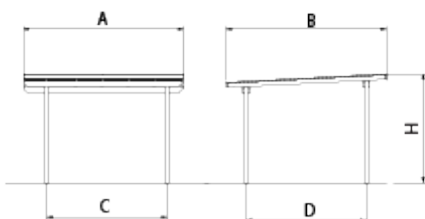

Regulations and certifications:

KALAHARI designer pergola, made of European Oregon pine (Douglas), 100% natural based on vegetable oils and resins, with golden oak UV protector. Asphalt roof (American shingle) in autumn brown. Stainless steel screws and hot-dip galvanized anchors. Individual assembly kit. Recommended anchoring: ground anchoring.

Materials & Finishes:

Pressure-treated pine wood, risk factor IV, ensuring its durability outdoors for a minimum period of 10 years. Under weather conditions, treated wood develops a warm honey-brown color that eventually turns into a natural silver-gray. If exposed to variable weather conditions, this type of pine wood may develop some surface cracks that do not diminish its durability in any way. Regarding resin and knots, it's important to note that these are part of its natural appearance.
