Treated pine wood

Low maintenance

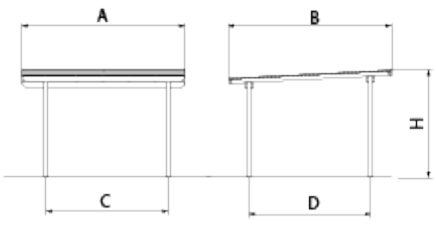

Regulations and certifications:

ISO 9001 ISO 50001 ISO 14001 ISO 45001

THAR designer pergola, made of European Oregon pine (Douglas). Lasur finish, 100% natural based on vegetable oils and resins, with golden oak UV protector. Asphalt roof (American shingle) in autumn brown. Stainless steel screws and hot-dip galvanized anchors. Individual assembly kit. Recommended anchoring: ground anchoring.

Materials & Finishes:

Pressure-treated pine wood, risk factor IV, ensuring its durability outdoors for a minimum period of 10 years. Under weather conditions, treated wood develops a warm honey-brown color that eventually turns into a natural silver-gray. If exposed to variable weather conditions, this type of pine wood may develop some surface cracks that do not diminish its durability in any way. Regarding resin and knots, it's important to note that these are part of its natural appearance.
