Need / Issue: The play area required renovation to improve durability, safety, and adaptation to the marine environment.
Solution: Installation of a new robinia wood play set with various play elements.
Result: A more attractive, safe, and integrated space is created, reinforcing the family-friendly character of the promenade.

At **Passeig del Mar in Palamós, the playground has been renovated,** incorporating a new play area designed to integrate with the seafront environment and withstand intensive use.
The space includes three main elements: **a cradle seat swing, a spring rider, and a pirate ship structure incorporating balance elements, slides, and a climbing net.** The entire set is **made of robinia wood,** a material particularly suitable for outdoor use due to its high durability and resistance.
Designed for children up to 6 years old, the playground integrates naturally into the promenade, introducing a maritime-themed play concept. The intervention combines structural robustness with a light, coherent design, enhancing the play experience and reinforcing the space as a family meeting point.

Lanzarote (Spain)

New park in Playa Honda (Lanzarote) promoting active lifestyles, featuring sports areas, robinia playground equipment, a skate park, and bicycle racks, enhancing the use of public space.

In the town of Playa Honda, **on the island of Lanzarote,** a new park has been inaugurated next to the airport, designed to enhance the use of public space and promote outdoor living.
The project integrates different areas designed for all ages. It includes **fitness-oriented elements** that encourage active lifestyles, **as well as children's play areas with robinia wood structures** that blend naturally into the surroundings. In addition, the **park features a LETO modular play unit,** expanding recreational opportunities for younger users.
The intervention is completed with a large skate park area, creating a dynamic meeting point for young people and sports users.
All areas are equipped with OMEGA bike racks, facilitating sustainable access and promoting cycling.
A project that combines sport, play and urban design to create a versatile, accessible space adapted to the needs of the community.
